## OBJECTIVE

---

Motivated Software Developer skilled in Python, C++, and Java, focused on building quality software solutions. Strong in problem-solving and eager to learn and explore new technologies.

## EDUCATION

---

**Bachelor of Technology in Computer Science and Engineering (AIML)** Expected 2026  
Gandhi Engineering College, Bhubaneswar CGPA: 8.03/10  
Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Web Technologies.

**Intermediate — Science Stream (PCM)** 2020 - 2022  
Percentage: 72.2%

**Matriculation** 2018 - 2020  
Percentage: 76.2%

## SKILLS

---

|                                    |                                                                       |
|------------------------------------|-----------------------------------------------------------------------|
| <b>Programming Languages</b>       | Python, C++, Java, JavaScript, TypeScript                             |
| <b>Web Technologies</b>            | HTML5, CSS3, JavaScript, Angular (Basic), REST API Development        |
| <b>Database Management</b>         | MySQL, MongoDB                                                        |
| <b>Software Development</b>        | Object-Oriented Design, SDLC, Agile, Scrum                            |
| <b>Tools &amp; Version Control</b> | Git, GitHub, VS Code, Postman                                         |
| <b>Core Competencies</b>           | Problem Solving, Analytical Skills, Debugging, Code Reviews, Teamwork |

## PROJECTS

---

**Student Management System — Python, MySQL.** Developed a comprehensive student management system with MySQL database integration. Implemented CRUD operations for student records, attendance tracking, and grade management. Applied object-oriented design principles to create modular code structure. Designed database schema and wrote optimized SQL queries. Integrated REST API endpoints for seamless data communication.

**Library Management System — C++, File Handling.** Developed a library management application using C++ with object-oriented programming concepts. Implemented features including book inventory management, member registration, and issue/return tracking. Utilized file handling techniques for persistent data storage. Applied data structures such as arrays, vectors, and maps for efficient data management. Implemented search and sorting algorithms to optimize operations.

## CERTIFICATIONS & COURSES

---

- **Python Programming Certification** - Udemy Foundation: Completed comprehensive Python course covering Basics, Object-Oriented Programming, Flask, NumPy, and Matplotlib. Gained hands-on experience in Python programming and application development.
- **Career Essentials** - NIIT Foundation: Completed training on Personality Development, Communication Skills, and Teamwork. Enhanced soft skills required for professional work environments.

## TRAINING & WORKSHOPS

---

- **Aspire for Her** (Supported by Infosys Foundation): Gained exposure to modern web development using React, HTML, CSS, and JavaScript. Built responsive user interfaces following industry-standard practices. Collaborated in team projects and learned project-based development workflows.
